1 Year Warranty

FAQ

1. Is this OEM new or 2nd source new design?

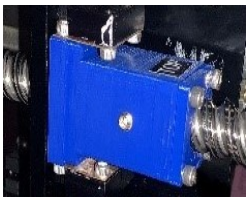

The BSI Lead Screw nut is a NEW BSI Proprietary Design that is a direct replacement and improved design for the OEM part.

2. Is the BSI-LeadNutKit new Nut?
The Lead Screw Nut in the kit is brand new and the kit comes with the nut and all necessary parts and instructions for installation.

3. How does BSI-LeadNutKit's compare in size, spec and quality to match the OEM parts?
The design of the nut exactly matches the performance specifications for the OEM with improvements in serviceability of the lubricating wick and fine adjustments for tension. There are over 100's of nuts currently in use globally in the field and millions of wafers have been handled using this design.

4. Is the install method the same as with OEM parts?
The installation method is similar or easier than the OEM version and the pictorial instruction set makes replacement simple.
