MADE IN THE USA

# DALLAS SEMICONDUCTOR SECURITY KEY

## Predictive Failure Part For Tencor Surfscan

### THE PROBLEM:

**Tencor Surfscan Models: 6100, 6200, 6210, 6220, 6400, 6410, 6420 have a Dallas Semi-conductor Security key on a circuit board in your Surfscan.**
**This Key Module has a Button Cell Watch Battery *SEALED inside* to keep the "Tool/Options Enabled" stored in Volatile Memory when the system is powered down. The replacement part is Obsolete and very hard to source. *This Battery Life is only 10 years!***

**Most likely, your Key Module was made 3 DECADES ago. So, you have 90% chance that your Key is almost dead or will die very quickly when AC power is removed from the Surfscan.**

**When your KEY memory ERASES - YOU ARE DOWN HARD!**

**DO NOT WAIT!!**

**REQUEST FORMAL QUOTE FOR MORE DETAILS.**
**Purchase Outright**

### THE SOLUTION:

**We have Custom Programmed Key Modules with New Battery!**

**Contact us and we can help you determine the options installed on your system.**

**Purchase Outright: $2,250.00**
**On Sale NOW : $1,000.00**

**Lead Time: 1 day**
**Warranty: 1 year**
